Inspection of chain, chain slings and components

Product information

Inspection of Lifting equipment must be carried out annually. The employer is responsible for the inspection of the lifting equipment used in hoisting work to be properly checked and comply with the provisions.

We carry out annual inspections and maintenance services for our customer's lifting equipment every day.

Government Decree 403/2008 At work, the safe use of machinery and tools and inspection obligate that the work equipment must be kept safe throughout the tools lifecycle.

The key to securing the safety is regular maintenance.

The definition of tools cover all lifting equipment:

- E.g. pulleys, clamps, lifting magnets
- Lifting equipment combinations
- Movable lifting equipment(e.g. shackles and lifting points)

WE TAKE CARE OF YOUR LIFTING EQUIPMENT THROUGHOUT THEIR LIFE CYCLE

- Inventory of products and maintenance of product information in our inspection system
- Reminders under the audit program automatically to the customer
- The inspection of lifting equipment is done according to the planned schedule, which ensures working as smoothly as possible.
- Our service repairs the flaws found during the inspection - this way the equipment will always be in a similar operating condition as a new one.
