Wall-mounted storage rack beam for lifting slings & tools

Product information

Wall-mounted storage rack beam is intended for convenient and safe storage of lifting slings and tools. It is a perfect solution for small workshops, garages or other rooms, where floor area is limited and it is more efficient to utilize wall space for storing. The structure of the unit is welded steel, and it is attached to the support wall with bolts from its end flanges – the flanges have one ø 14 mm fastening hole on each side. Open side of the beam frame contains hook tines (6 hooks, capacity 20 kg / hook) on which the lifting equipment / tools are hung. If the hook tine is too wide for some tool, such as a hoist top hook, an adapter component can be used in between (See the accessories). 2 × M10 anchor bolts are included in the delivery.

ACCESSORIES:

Hook and loop
The hook and loop fits directly into the rack's fixed hooks and enables for hanging the different kinds of products. (see the pictures of accessories)

- double wire hook | product code:**KO5005ISO**
- triangle hook | product code:**KOK503**
- webbing loop, EWL 25 cm / width 25 mm | product code:**UNV05005**
