

## Grade 120 chain slings

---

### Product information

The 120-grade Haklift lifting chain slings is a versatile and durable solution for lifting and moving heavy loads. The lifting chain is equipped with high-quality hooks and components.

Class 12 chains and components are approximately 50% stronger than their Class 8 counterparts. This has the advantage of allowing you to choose a smaller chain size, avoiding the need for heavy lifting equipment when performing lifting tasks.
