

Wall-mounted storage rack for lifting slings & tools

Product information

Wall-mounted storage rack is intended for convenient and safe storage of lifting slings and tools. It is a perfect solution for small workshops, garages or other rooms, where floor area is limited and it is more efficient to utilize wall space for storing. The structure of the unit is welded steel, and it is attached to the wall with bolts/screws from its back plate (holes 4 x $\varnothing$ 9 mm). Open side of the back plate contains round profile $\varnothing$ 16 mm J-hooks (5 hooks, capacity 20 kg / hook, opening 70 mm), on which the lifting equipment or tools are hung.
