

Universal Vertical track

Product information

Universal Vertical track steel 2.5 mm is a zinc-plated steel track for installation in vehicle bodies and cargo securing systems. Its universal design and 25 mm holes provide connection points for compatible track fittings and equipment.

Best used for:

- Vehicle body installations requiring a vertical universal steel track.
- Cargo securing systems using compatible 25 mm track fittings.

Product benefits:

- 2.5 mm steel construction provides a robust mounting profile.
- Zinc-plated finish protects the steel surface.
- 25 mm holes accommodate compatible track fittings.
- 2482 mm length supports installation along vehicle body walls.
- 86 mm width and 13 mm height provide defined installation dimensions
