

Thermo Pallet Hood Roller Cage

Product information

This insulated pallet hood is designed for protecting temperature-sensitive palletized goods during transport and temporary storage. The 300 g/m² insulation and silver Longlife foil provide thermal protection, while the two-part front opening supports practical access to the load.

Best used for:

- Temperature-sensitive goods requiring insulated pallet protection.
- Pallet loads where regular front access and documentation are required.

Product benefits:

- 300 g/m² insulation supports thermal protection of palletized goods.
- Thermal conductivity of 0.048 W/mK supports controlled heat transfer.
- Two-part front opening provides convenient access to the pallet load.
- Silver Longlife foil provides a durable outer protective layer.
- Integrated A5 document pocket keeps transport information accessible
