

Heavy duty cantilever racks

Produktinformation

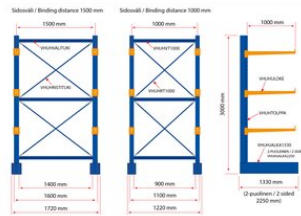

Cantilever rack helps to store long items efficiently while saving space. Can also be supplied to customer specifications. The Cantilever rack is available as a base and an extension, which is supplied without the second end element, so that the shelf can be connected to the base as an extension if several shelves are to be connected in a row. The range includes 1-sided and 2-sided models. The Cantilever racks are available with a binding distance of 1000 or 1500 mm. 1500 mm is the standard binding distance.
