

Hand swaging tool with wire cutter for 2-5 mm ferrules

Produktinformation

Hand swaging tool is suitable for small, soft metal and oval-shaped ferrules 2-5 mm used with steel wire ropes. The tool can be used to compress the ferrule and lock the wire rope in place, e.g. when creating a terminal loop. In addition, the tool have integrated wire cutters on the side of the jaw mechanism. Rubber coating on the handles ensures a firmer grip on the tool.
