

Fall Arrester WR 040MEWP

Produktinformation

This retractable fall arrester is designed for use on mobile elevating work platforms (MEWPs), including aerial work platforms and basket lifts, where there is a risk of falling from height. It provides reliable fall protection for operators working in elevated positions while limiting the force transmitted to the MEWP anchorage point to less than 3 kN during arrest.

Best used for:

- Basket lifts, boom lifts, and other mobile elevating work platforms.
- Working at height where low anchorage loading is required.

Product benefits:

- Designed specifically for vertical and horizontal MEWP applications.
- Limits force on MEWP attachment points to less than 3 kN.
- Retractable design supports unrestricted operator movement.
- Supplied with AZ011 and AZ 002ASI snap hooks for secure connection.
- Suitable for fall protection in elevated work environments.
